

Ali Kompany

Full-Stack Django Developer

ali@webkar.xyz | github.com/alicmp

About

I am a full-stack software developer with five years of experience. My main focus is on **Python** and **Django**. I also have good experience working with **Vue.js** and **DevOps** tools.

Experiences

Jun 2020 - Present

Full Stack Developer - Webkar Studio, *Iran*

- Taught myself Nuxt.js in two months and developed a website builder web application using Nuxt.js and Django
- Reduced server costs by 40% via optimizing docker configurations by using multi-stage builds and employing best practices
- Configured Nginx to support wildcard subdomains with zero downtime

Aug 2019 - Jun 2020

Back End Developer - Fitto EcoTourism, *Iran*

- Designed and developed Rest API for the social market platform with Django
- Made page load time 60% faster by optimizing images size for mobile devices
- Set up CI/CD pipelines with Bitbucket so that each commit tested well enough before it can make it to the production

Mar 2019 - Sep 2019

Back End Developer - RealtyBloc Solutions Corp, *Canada (Remote)*

- Added search APIs to Flask application using GraphQL and SQLAlchemy
- Collaborated with the senior developer to set up ELK stack for logging all the activities and created visualization in Kibana for the marketing team
- Hands-on experience in maintaining the project on AWS EC2, S3, and lambda

Dec 2017 - SEP 2018

Junior Full Stack Developer - Shiraz EMS, *Iran*

- Built e-learning platform with Django and deployed it on Centos server

Projects

Jun 2021 - Present

Webkar Academy Youtube Channel - bit.ly/3soyrmY

I recently started a Youtube channel dedicated to teaching more advanced topics about Python and back-end development.

Education

Spring 2017

Shiraz University, Iran - BS in Software Engineering
