About

I am a full stack software engineer, mainly focused on Python, Django and Vue.js. I Also enthusiastic about other programming topics such as data science. I love to learn and love to teach what I learned to others.

Experience

JUN 2020 - Present

Webkar Studio, Iran - Cofounder - webkar.xyz

- As cofounder i have to deal with clients and manage our small team
- As the technical co-founder, I have to wear many hats, from writing code (Django, Vue.js, Nuxt.js) and tests to maintaining and monitoring (Sentry, watchdog) servers

AUGUST 2019 - JUN 2020

Fitto EcoTourism Social Market, Iran - DevOps Engineer - Fitto.ir

- Rewrite whole project with Django which previously implemented via Laravel
- Dockerized both backend and frontend which implemented via Vue.js
- Implement CD process for zero downtime

MARCH 2019 - AUGUST 2019

RealtyBloc Solutions Corp, Canada *(Remote)* - Back End Developer

- Added new features to API which were implemented by Flask and GraphQL
- Setup ElasticStack, extracted logs with Logstash and Filebeat and created visualization in Kibana for the marketing team
- Optimized speed and memory usage of Python scripts which run periodically by cron
- Wrote Unittest and set up CI-CD

DECEMBER 2016 - March 2019

Shiraz EMS, Iran - Full Stack Software Engineer - eop.sums.ac.ir

- Developed front-end with Bootstrap and JQuery and back-end with Django
- Deployed project to Centos server and maintained it

Projects

MARCH 2020 -Present

Youtube Channel

Like others, i owe big chunk of what i know to youtube channels and medium articles, so the goal for this project is to give back to community: youtube.com/channel/UC6IH7w-m-l-eaKTzyib-Rfg

Education

FALL 2011 - SPRING 2017

Shiraz University, Iran - *Bachelor in Software Engineering*
